

June 20TH, 2016

Dear Owners,

The Board received this note from Blaine our Construction Manager today:

Today we passed the final aqueduct authority inspection for the water supply to the property. This means that there are no longer any restrictions on unit owners being able to get a water meter for their site. Blaine Lounsbury, Bel Custom Construction, INC

We are delighted to share this progress with you. Look for more details and drawings on our website: www.KeyLargoOceanResort.com. In the coming days, as they become available, we will post presentation drawings. It has been a wonderful calibration and many hours of coordination and labor; but we are all very excited to share them with you.

Board of Directors
